

IEG-FCH2

ELECTROMAGNETIC LEVEL INDICATORS WITH ONE CONTACT AND SIDE USE WITH PRESS-FIT CONNECTION

USE:

Made to ensure, with maximum safety, the minimum or maximum level of liquids in tanks compatible with the material of the level indicator.

OPERATION:

When the float of the indicator approaches the Reed switch at the pre-established point, the contact activated by the magnet housed in the float opens or closes, thus obtaining the possibility of sending a luminous or acoustic signal or activating or disconnecting any electrical equipment connected to it.

FITTING:

The indicator must be fitted in the side position at the required place to be controlled.

IMPORTANT:

To invert the contact from N.C. to N.O. just turn the level indicator 180°.

MODEL	MATERIAL	CONNECTION	ELECTRICAL CONTACTS	ELECTRICAL CHARACTERISTICS				CABLE	TEMP. °C	MAX. PRESSURE
