

► Read and follow these safety instructions first and take notice of the operating instructions.

Safety instructions

1. The installation, initial operation and maintenance may be done by a qualified expert with electrical know-how only.
2. Comply with the local and statutory rules and regulations and/or the VDE 0100.
3. Take notice of the temperature specifications at the data plate.
4. A fuse (with max. 4A) has to be connected in series to the voltage supply.
5. Protect the signal contact from voltage peaks when inductive loads are connected.
6. The device may put into operation if it is closed, only.
7. Switch off the power supply, before opening the device. (touchdangerous voltage)

Operating instructions

1. Description

1.1 Intended use

The level indicator observes the filling level as a limit switch in silos and vessels. It can be used as full, demand and empty indicator for dusty and powdery, granulated and grainy bulk goods with a max. grain size up to 30 mm and with a bulk density of 0.3 t/m³ ... 2.5 t/m³.

1.2 Function

The bulk goods presses with its weight against the membrane. A tappet directly transfers the pressure from the membrane to the switch. When the bulk goods are decreasing, pressure is taken off the membrane and the switch will be interconnected.

1.3 Technical data

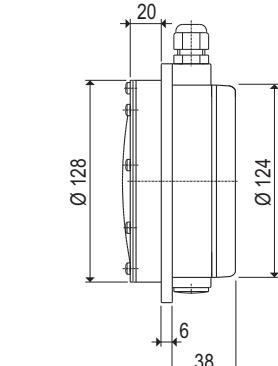

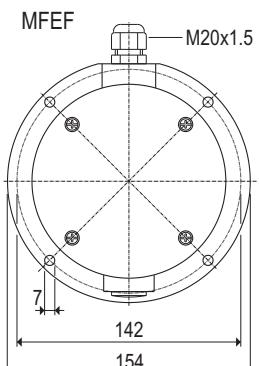

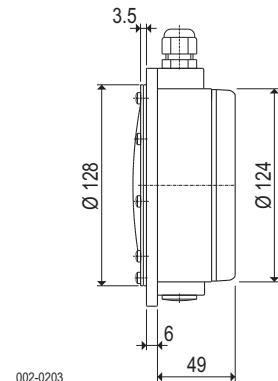

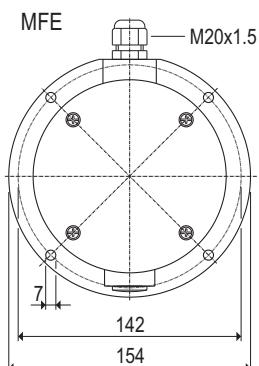

Manufacturer	MOLLET Füllstandtechnik GmbH	
Address	Industriepark RIO 103 74706 Osterburken	
Name	Membrane level indicator	
Type	MFE (GFK) and MFE-A (Alu) MFEF (GFK) and MFEF-A (Alu)	
Temperature range	GFK	Aluminium
	-20 °C ... +60 °C	-25 °C ... +80 °C
Signal contact	change-over contact, potentialfree	
Capacity of the contact	Contact 4 A / 250 V AC 24 V ... 250 V AC or 12 V ... 125 V DC	
Switching voltage	Contact 4 A / 250 V AC 24 V ... 250 V AC or 12 V ... 125 V DC	
Sensitivity	60 g ... 200 g adjustable	
Response delay	none	
Cable connection	Scrwe M4	
Cable entry	Cable gland M20x1.5	
Type of protection acc. to DIN EN 60529	IP40 IP53 if cable gland is upwards IP65 with stainless steel membrane IP66 with aluminium housing	
Overpressure safety	up to 1 bar	
Weight	MFE 0.48 kg	MFE-A 0.95 kg
	MFEF 0.49 kg	MFEF-A 1.00 kg
Maintenance	none	
Mounting position	any position	

1.4 Materials

Type	Housing
MFE(F)- ...	GFK (glass-fibre reinforced plastics)
MFE(F)-A ...	Aluminium

Type	Membrane	Mounting ring
MFE(F)- NN	NBR	Steel, galvanized
MFE(F)- VN	VITON	Steel, galvanized
MFE(F)- NE	NBR	Stainless steel 1.4301 / 304
MFE(F)- VE	VITON	Stainless steel 1.4301 / 304
MFE(F)- EE	304	Stainless steel 1.4301 / 304

1.5 Dimensions

2. Installation

2.1 Preparation

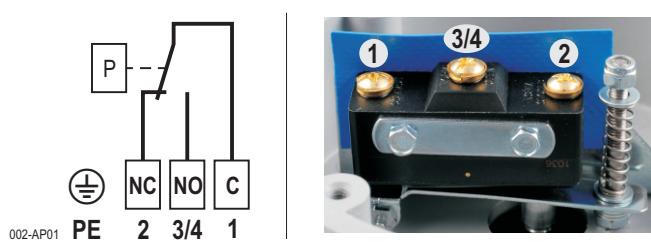

- Check the membrane of visual transport damage.
- Read and follow the safety instructions and the operating instructions, before handling with the device !

2.2 Mounting in the vessel

Position the level indicator with the gasket at the provided flange and fix it with 4 washers and screws M6.

2.3 Electrical connection

Circuit diagram

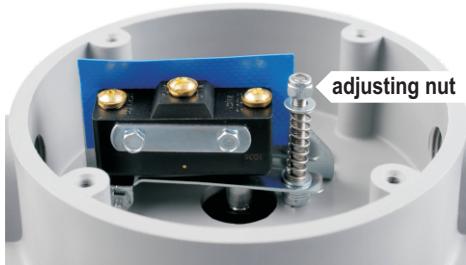

2.4 Cable gland

- After electrical connection, tighten the cable gland.
- Screw the cap nut, until the cable entry is closed tightly.

3. Commissioning

- Put the level indicator into operation only, if the installation and the electrical connection have been done correctly.
- The level indicator is preset at sensitive.
- With the adjusting nut the device can be adjustable insensitive. Clockwise insensitive.

4. Utilization

4.1 Normal operation

- Use the level indicator in its intended application only.
- The level indicator is provided for use in silos or vessels with pressureless operation.
- Comply with the specifications on the data plate. Check the membrane of the level indicator, when the permissible temperature of bulk goods was exceeded or was fallen short off.
- Damaged devices have to put out of operation immediately.

4.2 Inexpert handling

- Ignoring of the safety instructions and the operating instructions.
- Not intended use.
- Mounting of spare parts which are no original parts.
- Violation against applicable law and standards.

5. Maintenance and servicing

5.1 General informations

- Do maintenance work only, if the silo or the vessel is empty and if there is no overpressure or vacuum.
- Use original spare parts only.

5.2 Maintenance

- Inspect in regular intervals if there is any wear or abrasion at the membrane. Define the control intervals, depending on the characteristics of the bulk goods.
- In case of damage or abrasion, replace the membrane immediately with a new membrane.

5.3 Servicing

- Damaged parts have immediately replaced with similar.
- Until the complete reconstruction of the proper function, the level indicator must not be used any more.

6. Storage

- Store the level indicator dry and dust-free.
- Protect the membrane against pointed objects and ultraviolet radiation.

7. Disposal

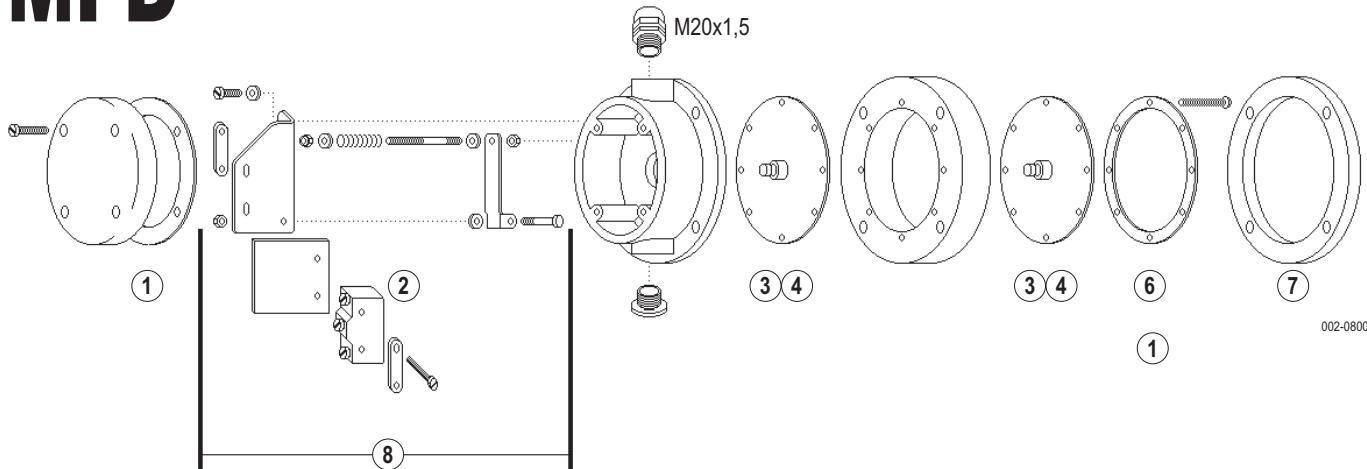

- The level indicator can be recycled.
- The disposal applies to the valid environmental guidelines according to the location of the carrier and the local manufacturing conditions.

Tel. 06291 64400 Fax 06291 9846

erklären hiermit, dass die Geräte:

Füllstandanzeiger
Füllstand-Grenzschalter der Typenreihen:

D ... , M ... , P ... , R ... , T ... , V ...

auf die sich diese Erklärung bezieht, den folgenden Normen oder normativen Dokumenten entsprechen:

Richtlinie 2006/95/EG (NSR-Richtlinie)
Richtlinie 2004/108/EG (EMV-Richtlinie)

und

EN 61010-1, EN 60529

EN 61326-1

Die grundlegenden Sicherheits- und Gesundheitsanforderungen werden erfüllt gemäß den Bestimmungen der Richtlinien und durch Einhaltung der Normen soweit es im Rahmen des Lieferumfanges möglich ist.

declare that the devices:

Level indicator
Level limit switch of type:

D ... , M ... , P ... , R ... , T ... , V ...

to which this declaration relates is in accordance with the following standards or other normative documents:

Directive 2006/95/EC (Directive LVD)
Directive 2004/108/EC (Directive EMC)

and

EN 61010-1, EN 60529

EN 61326-1

The Essential Health and Safety Requirements are assured by compliance with the directive and observance of the normative documents, as far as the scope of delivery allows.

Osterburken, 07. Januar 2010
