

EZM 4000

EZM 4000

Masterfix is introducing a new member of the EZMaster Power tool series. This new hydraulic/pneumatic tool combines strength and reliability with a sleek, attractive and ergonomically sound design.

All Masterfix power tools comply with existing CE standards.

EZM 4000 - is equipped with:

Tool free stroke setting mechanism with a scale on the front sleeve

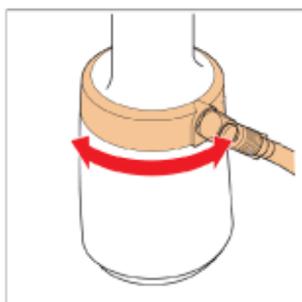

Quick mandrel release system

Safety valves

Advanced hydraulic system for oil free service

Fast release button for motor reverse

360° revolvable air supply unit

The 360° revolvable air supply unit can be turned in any position so that the hose does not obstruct your work space. Thus providing a comfortable and safe work environment.
