- ACP-HF Type은 다소 양정이 요구되는 공작기계에 사용되는 침수식 펌프로써 별도의 오일마중이 필요치 않고, Mechanical-seal이 적용되지 않아 공회전에 의한 고장발생이 없으며, 외관이 콤팩트하여 범용 공작기계에 널리 사용 된다.
- ACP-HF series is used in machine tools needed higher lift-up than ACP-F type. It has little idle working trouble because of no mechanical seal. It is compact design and widely used in general machine tools.
