## Features

### Flexmaster Joints in Standard and Self-restrained Configurations

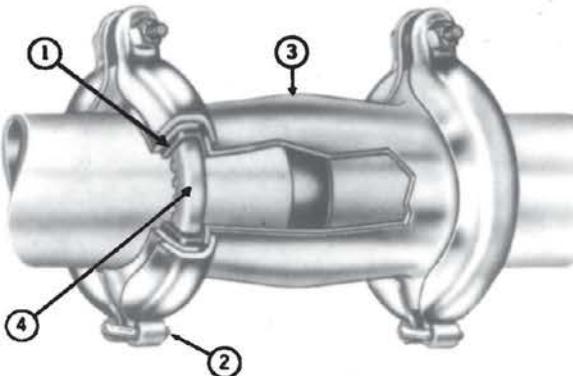

#### Standard Features

1. Gasket provides compression seal when tightened against tube or pipe.
2. Hinged coupling provides for quick, easy assembly.
3. Bulged sleeve allows for  $\pm 4^\circ$  angular misalignment.

All gasket materials listed on page 4 are available in the standard style, increasing the number of suitable applications.

Flexmaster joints are available in both standard and self-restrained styles. The self-restrained style has a stainless steel gripping ring inside each gasket. This feature allows the joint to maintain a firm grip on the pipe or tube, preventing movement along the pipe or tube.

The bulged, straight-through Flexmaster joints accommodate angular misalignment up to  $\pm 4^\circ$  per end. Tees, elbows, and crosses accommodate angular misalignment up to  $\pm 20$  per end. See pages 10 thru 17 for the angular misalignment allowed on each specific part. Flexmaster joints are designed for up to 300 psi (2.07 MPa) service, depending on application and size. Refer to pressure ratings on page 4.

#### Self-Restrained Features

1. Gasket provides compression seal when tightened against tube or pipe.
2. Hinged coupling provides for quick, easy assembly.
3. Bulged sleeve allows for  $\pm 4^\circ$  angular misalignment.
4. Notched channel ring which grips pipe firmly to restrict movement along pipe or tubing.

Gasket materials available include the C (Buna-N) and D (EPDM) compounds.

Flexmaster joints absorb vibration and are ideal for making quick connections and disconnections when repairing or disassembling a system. They can be furnished with several types of gasket compounds and sleeve materials, including stainless steel for marine and corrosive applications.

Flexmaster joints are currently in use in thousands of applications throughout the world. For typical Flexmaster joint applications see photos on page 2.

## Features

**Save Time - Make Pipe And Tube Connection Easier**

**Used on Plain End  
Tube or Pipe**

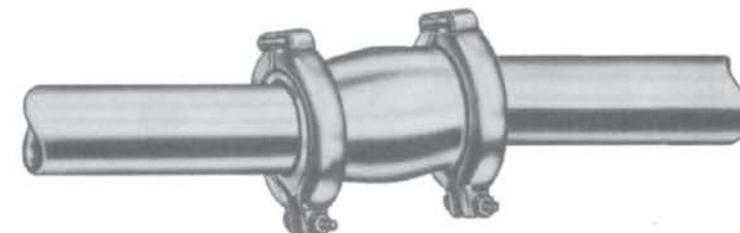

No threading, flanging, welding, grooving or other special end preparation of tube or pipe is required. Use pipe after it is cut to appropriate lengths. The Flexmaster joint will accommodate large tolerances in the length of the gap. See Table 1, page 9 for insertion depth tolerances.

**Absorbs Vibration**

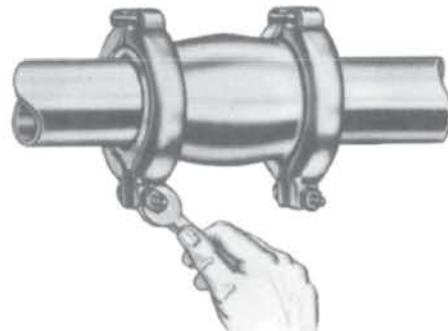

Pipe vibration and noise can be drastically reduced with Flexmaster joints. The resilient, thick rubber of the Flexmaster joint gasket absorbs vibration and noise. Use of the self-restrained style restricts movement along vibrating pipes and tubes.

**Even Misaligned  
Piping is No Problem**

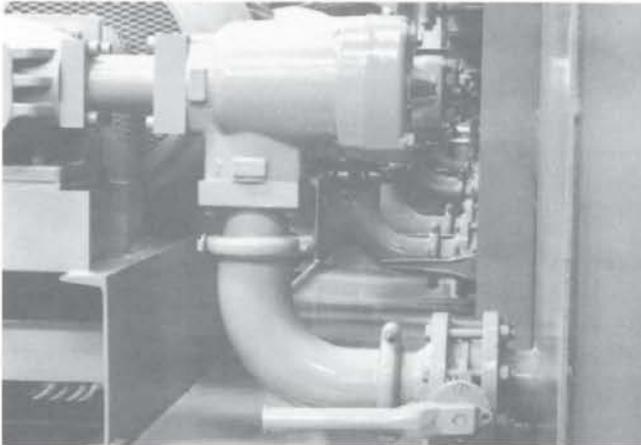

The Flexmaster joint design eliminates flanged bolt holes and pipe threads that require careful alignment. The Flexmaster bulged joint permits up to a total of  $\pm 4^\circ$  angular installation misalignment at each end while maintaining a leak proof seal.

**Easy to Install**

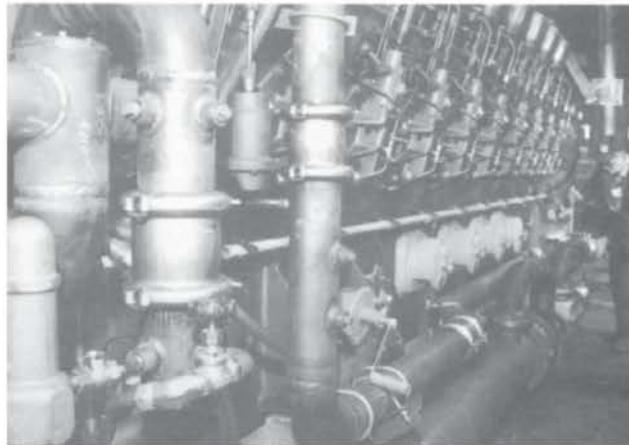

Installation time can be slashed by using Flexmaster joints. Basic assembly tools are all that's needed. After extensive use, the gaskets can be replaced easily and quickly. See page 8 for complete assembly instructions.

## Applications

Flexmaster joint elbows on a large hydraulic power system, which connect pipe from pumps to hydraulic fluid reservoirs.

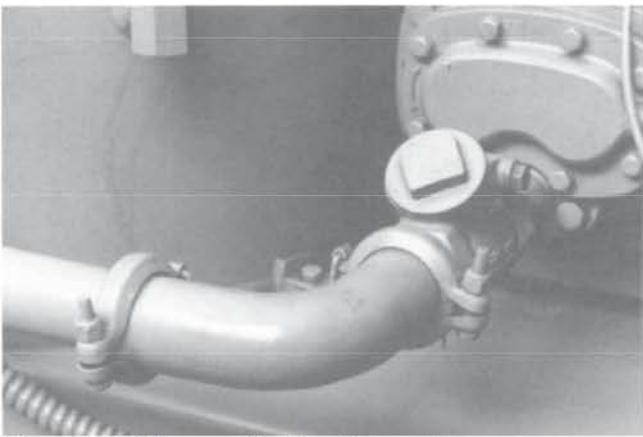

Flexmaster joints join water lines on a huge diesel engine.

A number of Flexmaster joints are installed on this compressor to connect water and oil lines, providing quick, easy connection and protection against vibration.

A large dry-cleaning plant uses Flexmaster joints to connect piping at elbow junctures.

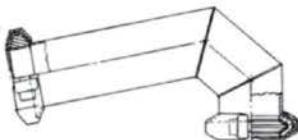

Flexmaster joints are used to join piping on air compressors.

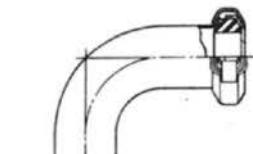

## Specials

Made to Order

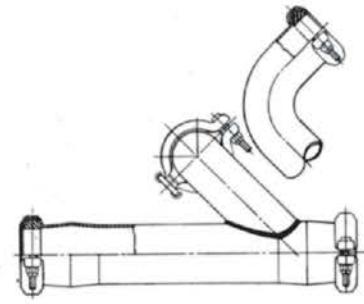

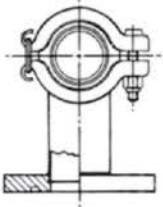

Special Configurations and  
Seal Materials Can Be Ordered

**Salt Water,  
All 316 Stainless**

**Special  
Flanged  
Assemblies**

**Lube Oil, Special Configuration**

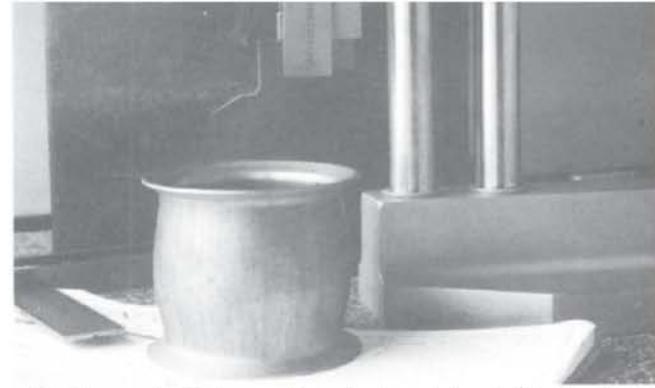

Flexmaster joints can be produced with various configurations and terminal end designs. A few of the special Flexmaster joint configurations which have been manufactured by Eaton are displayed above. Please consult Eaton when ordering specials.

### Manufacturing

Flexmaster joints are manufactured by highly experienced and trained individuals who are dedicated solely to the production and packaging of Flexmaster joints.

### Engineering

The Flexmaster joints manufacturing team is backed by the strong technical support from Eaton's engineering staff.

| S                     | Silicone           | Rust Orange     | None                       |

### PRESSURE RATINGS †

| Size Range<br>Pipe | Tube                         | Standard<br>Gasket    | Self-Restrained<br>Gasket |
|--------------------|------------------------------|-----------------------|---------------------------|
| 3/8 - 3/4          | 1/2 - 1 3/8<br>12.7 - 35.1   | 300 psi<br>(2.07 MPa) | 300 psi<br>(2.07 MPa)     |
| 1-2                | 1 1/2 - 2 1/2<br>38.1 - 63.5 | 200 psi<br>(1.38 MPa) | 200 psi<br>(1.38 MPa)     |
| 2 1/2 - 6          | 3 - 6<br>76.2 - 152.4        | 150 psi<br>(1.03 MPa) | 150 psi<br>(1.03 MPa)     |

† Warning: The Flexmaster joint is designed to seal pipe and tube connections. The Flexmaster joint is not intended to hold piping systems together. Normal hangers, guides, anchors and other external piping restraints must be used to restrain the piping or tubing system from movement

### PIPE AND TUBE MATERIALS WHICH CAN BE CONNECTED BY FLEXMASTER JOINTS\*

| Pipe or Tube<br>Material | Standard<br>Gasket | Self-Restrained<br>Gasket** |
|--------------------------|--------------------|-----------------------------|
| Carbon Steel             | X                  | X                           |
| Stainless Steel          | X                  | X                           |
| Aluminum                 | X                  | Not Recommended             |
| P.V.C. (Plastic)         | X                  | Not Recommended             |
| Copper                   | X                  | Not Recommended             |

\* All piping and tubing connected by Flexmaster joints must meet the nominal O.D. dimensions presented on pages 10 - 17.

\*\* Piping and Tubing, which use self-restrained gaskets, must have a hardness between 45-85 on a Rockwell "B" scale (45 - 85 Rb).

## Technical Data

### Gasket Selector Chart

An important consideration in the selection of a gasket material is to avoid undesirable chemical reaction between the agent carried and the gasket material. The gasket selector chart indicates the compound most serviceable in specific agents.

**Gasket Material:**  
 C – BUNA-N (standard)  
 D – EPDM  
 N – BUNA-N  
 (high temperature)  
 V – Fluorocarbon  
 S – Silicone

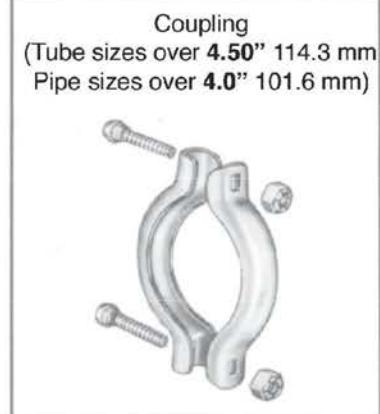

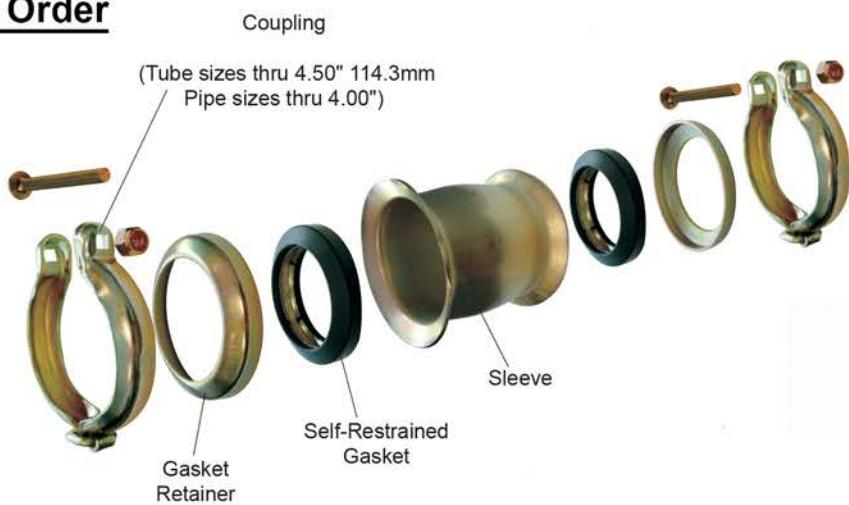

**Key:**  
 G – GOOD  
 F – FAIR  
 – Not Recommended

| FLUID   | GASKET MATERIAL |     |   |   |

## How To Order

### **Standard (Un-Restrained) Style**

### **Self-Restrained Style**

**NH16XX ( ) 000 ( ) 000**

Basic Part Number (from pages 10 - 17)

**Example: NH1600**

Gasket Material: \_\_\_\_\_

C = BUNA-N (standard)

D = EPDM

\*N = BUNA-N (high temperature)

\*S = Silicone

\*V = Fluorocarbon

\* Available in Standard (Un-Restrained) Model Only.

Joint Length (in thousands of inch).

**Example: 2.5" = 0250**

Style is available in lengths shown. Other lengths are available in multiples of 1-inch on special requests. Contact Eaton for availability

Sleeve Material:

B = Plated Steel (Standard)

S = Stainless Steel (Sleeve only consult  
**NEW-LINE** for availability)

Size of Pipe or Tube to be connected  
(in hundredths of inch) Example: .75" = 075

**Example Part Number: NH1600C075B0250**

Complete assemblies may be ordered by the procedure shown above.  
Standard components may be ordered as shown on page 7.

## Technical Data

### Parts List

Gasket Material: C – BUNA-N (standard)

D – EPDM

N – BUNA-N

(high temperature)

V – Fluorocarbon

S – Silicone

(Other materials available. Consult **NEW-LINE**.)

### BOLT PART NUMBERS

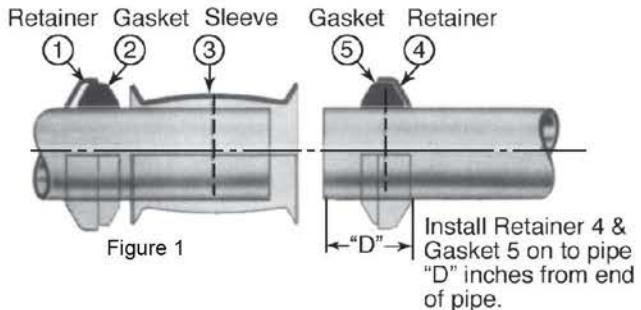

| JOINT SIZE<br>(inches) | BOLT<br>PART NUMBER | NUT<br>PART NUMBER |
|------------------------|---------------------|--------------------|
| Tube                   | Pipe                | Carbon Steel       |
| .50 to 1.12            | .38 to .75          | 56519A4-7          |
| 1.25 to 2.50           | 1 to 2              | 56519A5-8          |
| 2.75 to 5              | 2.50 to 4           | 56519A6-12         |
| 6                      | 5 to 6              | 56519A8-16         |

## Assembly Instructions

### Pipe and Tubing Preparation and Flexmaster Joint Installation Instructions

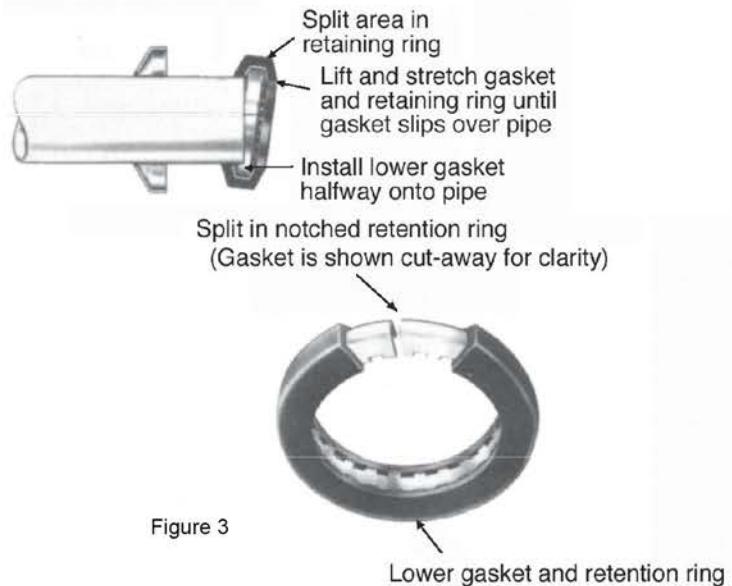

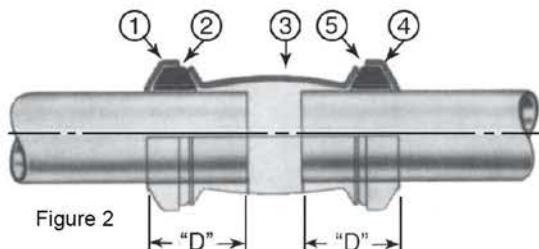

#### 1. Pipe (Tube) End Preparation

- Deburr and clean pipe (tube) ends.
- Surface should be free of deep scratches, gouges, dents, dirt, etc.

#### 2. Joint Installation

- Install retainer (1), gasket\* (2) and sleeve (3) on one side of pipe in sequence shown in Figure 1.
- Install remaining retainer (4) and gasket (5) on other pipe end.
- Position retainer (4) and gasket (5) to proper pipe insertion depth ("D") as shown in Table 1.
- Slide sleeve (3) to gasket (5) and move gasket (2) and retainer (1) into position as shown in Figure 2. Pipe must be inserted to proper depth ("D") into both gaskets as shown in Table 1.

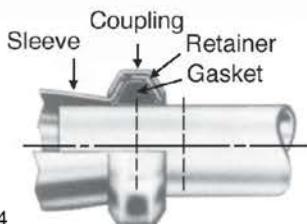

#### \*3. Special Notes

- Assembly of gaskets can be made easier by dipping gaskets in water or the fluid to be sealed. The use of other rubber lubricants can be detrimental to the life of the gaskets. Never lubricate the metal parts.
- Self-restrained gasket installation. To simplify installation of a self-restrained gasket, install lower gasket halfway onto the pipe first, leaving the split area in the steel retaining ring free at the top. See Figure 3. Then, stretch the gasket and split area of the retaining ring until they slip over the tube or pipe and into position. Refer to Figure 3.

#### 4. Coupler Installation

- Install both V-couplings, encompassing the retainer, gasket and sleeve as shown in Figure 4. Do not tighten either coupling until the entire joint is assembled (See Figure 2). Tighten nuts to the torque specified in Table 2. Do NOT lubricate the nut or bolt before assembly. The gap method outlined in Table 3 may be used for standard gaskets only.

Note: Letter X in part numbers shown indicates a code letter to be filled in. See Page 6 for explanation of part numbers and how to order.

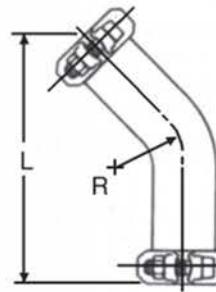

\* Gray part numbers are standard type. Black part numbers are self-restrained type.

\*\* Sleeve in this size is cylindrical (no-bulge). Allowable misalignment is  $\pm 2^\circ$  per end for this size.

Dimensions: inches in bold, mm in light
