

- **Universal:** RTD (3 or 4 wires), thermocouple, mV, mA
- **CNL40iG** Galvanic isolation
- **CNL40iGH** + HART protocol
- **CNL40iGL** Low cost version
- **Fully configurable** RS232 and HART
- **FDT certified DTM HART Drivers**
- **Loop powered:** Powered by the 4-20 mA loop current
- **SIL2 conformity** according to IEC 61508

HART

The CNL40ig is a universal smart in-head mounting temperature sensor transmitters. Cover all temperature measurement (RTD and thermocouples) in all range with an unique device. The CNL40igH integrate the HART communication protocol, FDT compliant and it is available with SIL2 conformity according to IEC 61508 standard.

Temperature measurement:

- Thermocouples, platinum resistance sensor.

Sensor correction:

- RTD and thermocouple linearization,
- Cold junction compensation for thermocouple,
- Line length compensation for RTD.

Process measures:

- Voltage (mV), current (mA) on external shunt.

Signal conditioning:

- Square root extraction (on process measures),
- Programmable sensor breaking safety value,
- Programmable response time from 0.2 to 60 sec, (measure filtering function)
- Reverse or standard output,
- Measure offset adjustment,
- Neutralization of ambient thermal variation effects

Features:

- Temperature sensor in-head anti-vibration mounting: optimal fitting of measure element in thermowell with the spring loaded. Improved reliability and response time accuracy.
- wiring on spring terminal (stainless) (1.5mm² wire gauge),
- loop voltage presence indicated by Led,
- reverse polarity protected,
- input/output isolation (elimination of measure errors due to ground loop),
- protection rating (enclosure/terminals): IP68 / IP20

Mounting and connection:

- For DIN B head, M4 screw (33mm between axis)
- wide central tunnel for wires path (7 mm diameter)

Performance / Environment:

- Long-term stability 0.1 % / year,
- operating temperature up to 85 °C peak,
- excellent EMC performance,
- resistant, protected against shocks and vibrations (silicon bonding resin)

Configuration

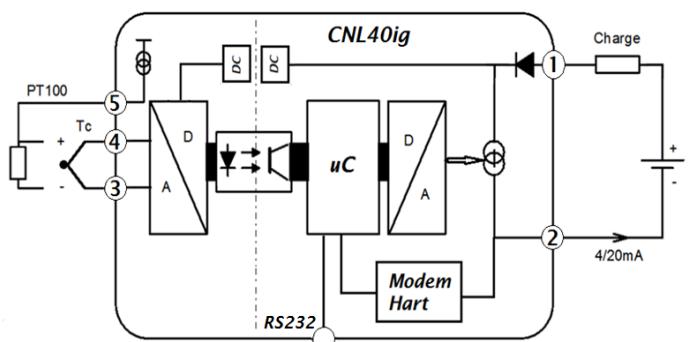

- setting by RS232 serial link (terminal mode without specific software)
- USB-RS232 cable available separately
- Online communication and setting with standard HART programming handheld (cnl40igH)

Operational safety data:

Type B components, HFT = 0
 λ_f : 458 fit (1/MTBF)
 DC : 91.8 % (Diagnostic Coverage)
 PFH : 21 fit (Probability of Failure per Hour)
 SFF : 95.4.1 % (Safe Failure Fraction)

Synoptic
